- 1. Speed Data The speed data analysis shows travel speeds being lower than the posted speed limit.
- 2. Crash Data This location experienced three injury-related crashes.
- 3. Field Assessment The following site characteristics suggest a need for a safer travel environment:
 - a. This is a residential area with houses on the south side of the street.
 - b. There is one school in the area, St. John's College High School.
 - c. The Western Ridge Trail and the Rock Creek Park Nature Center and Planetarium are in the area which generate pedestrian and bicycle activity.
 - d. There are multiple bus stops in the area which generate pedestrian activity.

W3 - 208

Although the speed data analysis showed travel speeds being lower than the posted speed limit at this location, there were a number of injury-related crashes at this location. Residents are concerned that there is speeding on Military Road in this area. Due to the number of injury-related crashes, the specific site characteristics of a residential area, and the proximity to schools, parks and recreational areas, and the pedestrian generators, there is a nexus between traffic safety and the speed camera at this location
