

OFFICE OF THE MAYOR

NOTICE OF PROPOSED RULEMAKING

The Mayor of the District of Columbia, pursuant to the Sign Regulation Authorization Emergency Amendment Act of 2012 (Act), effective July 11, 2012 (D.C. Act 19-387; 59 DCR 8491), and any substantially similar successor legislation; section 1 of An Act To regulate the erection, hanging, placing, painting, display, and maintenance of outdoor signs and other forms of exterior advertising within the District of Columbia, effective July 11, 2012 (D.C. Act 19-387; D.C. Official Code § 1-303.21), and Mayor's Order 2011-181, dated October 31, 2011, hereby gives notice of the intent to adopt a new title 13 (Sign Regulations) of the District of Columbia Municipal Regulations (DCMR):

The proposed new title would update and consolidate the District's current sign regulations into a single title, removing the bulk of these provisions from the Building Code and scattered sections of the DCMR. It would clarify provisions relating to approval of Special Signs and billboards; amend the current rules to respond to issues raised by the Federal Highway Administration; create new Designated Entertainment Areas that would be open to the display of new signs; clarify the existing regulations as they relate to signs on public space, private property, and specific areas of the District; establish a means for enforcement; and establish a permit application fee schedule and a schedule of fines and infractions.

The Mayor also gives notice of his intent to take final rulemaking action to adopt the proposed new title in not less than forty five (45) days after the date of publication of this notice in the *D.C. Register*. Section 2(a) of the Act requires the Mayor to submit the proposed rules to the Council for a forty five (45) day period of review, excluding Saturdays, Sundays, legal holidays, and days of Council recess. The proposed rules shall not become effective until the rulemaking is approved or deemed approved by the Council.

------	-------------

CHAPTER 1 PURPOSE AND SCOPE

100

PURPOSE

100.1

Signs constitute a separate and distinct use of the land upon which they are placed and affect the use of adjacent streets, sidewalks, and other public and private places.

100.2

Signs are used by individuals and public, private, and government organizations to communicate information to the public. Signs are vital to a healthy business environment and civic communications. They can create a vibrant sense of place and foster economic development. However, the unregulated construction, placement, and display of signs may constitute a public nuisance detrimental to the health, safety, convenience, and welfare of the residents of the District of Columbia.

100.3

The purpose of this title is to establish reasonable and impartial regulations for all signs, whether exterior signs or interior signs intended to be visible from the outside, on public space or on private property. These regulations regulate the display of signs to convey information; maintain the health, safety, convenience, and welfare of residents and businesses of the District; and improve the overall visual appearance of outdoor space throughout the District.

100.4

These regulations do not apply to interior signs that are not intended to be visible from the exterior of the building in which they are displayed. Such signs remain subject to all other applicable statutes and regulations.

100.5

These regulations are further intended to:

- (a) Reduce the traffic hazards caused by signs that may distract, confuse, or impair the vision of motorists and pedestrians, and ensure the effectiveness of traffic signs and signals;
- (b) Protect property values by ensuring the compatibility of signs with the property surrounding them;
- (c) Provide an attractive visual environment throughout the District;
- (d) Allow for the reasonable promotion of commerce and expression of business identification;
- (e)- Provide for distinctive signage in areas of the city that have been identified for this type of sign through District planning documents because they are major entertainment and other areas suitable for signage, when not in conflict with this title or any other federal or local law;

[This provision is stated too narrowly and is inconsistent with the overall policy in the draft regulations of permitting various types of signage in different areas besides just entertainment areas.]

- (f) Ensure compliance with federal laws and Federal Highway Administration regulations and memoranda;
- (g) Protect the public investment in streets, highways and other public improvements; and
- (h) Protect and improve the public health, safety, and general welfare.

100.6 The regulations in this title advance these governmental interests and objectives and are the minimum amount of regulation necessary to achieve them.

101 SCOPE

101.1 This title governs the display of signs on private property and on public space, except those displayed by the District of Columbia or the United States in furtherance of their governmental responsibilities, those permitted by contracts or legal agreements with the District of Columbia government, those displayed on the interior of a building that are not intended to be visible from the exterior, and those otherwise required by law to be displayed.

101.2 This title shall supplement any additional, relevant provisions stated elsewhere in District law.

- 303.5 Additional information and guidelines not required under this title but required by the Commission for their review of sign applications may be available directly from the Commission.

304 PROHIBITED SIGNS

- 304.1 Special Signs, billboards, signs on roofs, flashing neon signs, television and video monitors and electronic signs are prohibited in the area controlled by the Old Georgetown Act. ~~Television and video monitors in storefront windows shall be limited~~
- [There is no apparent policy reason to no more than twenty percent (20%) prohibit all forms of off-premise signage in the area of Georgetown areas and then create an exemption for intrusive television and video monitors. In addition, it is unclear what the window in which the technical difference is between a prohibited “electronic sign” and a “television or monitor is video signs” or why one type would be less problematic than the other. Finally, there is no limitation on a property owner who might use, or lease the right to be displayed others to place multiple “television or video” monitors in multiple windows to combine into a much larger integrated sign that exceeds any size standard, larger-sized single-sign matrix.]

EXCEPTIONS

Formatted: Normal, Keep with next

306.1

When the Commission finds that a sign or the conditions surrounding a sign subject to this chapter justifies granting an exception from any of the requirements of this chapter, and the Commission further finds that granting such an exception will not impair the intent and purpose of this chapter or of the Old Georgetown Act or the Shipstead-Luce Act, the Commission may notify the permitting official of its support of such an exception. The permitting official may approve an application to erect a sign not conforming to these requirements pursuant to the Commission's recommendation if the sign satisfies all other requirements of this title.
