I am sooo against the new 10 ft rule that would endanger current food truck locations. Please do not put the proposed rule into action! I eat from a truck at Farragut almost every day so every day I see that these trucks bring vitality to this city that sorely needs it. I also see that the area is easily navigable when the trucks are present. This new rule would not only stifle young entrepreneurs that put together these small businesses, but also make the central city a sad, ordinary, uninspired place again.
